

Node Js

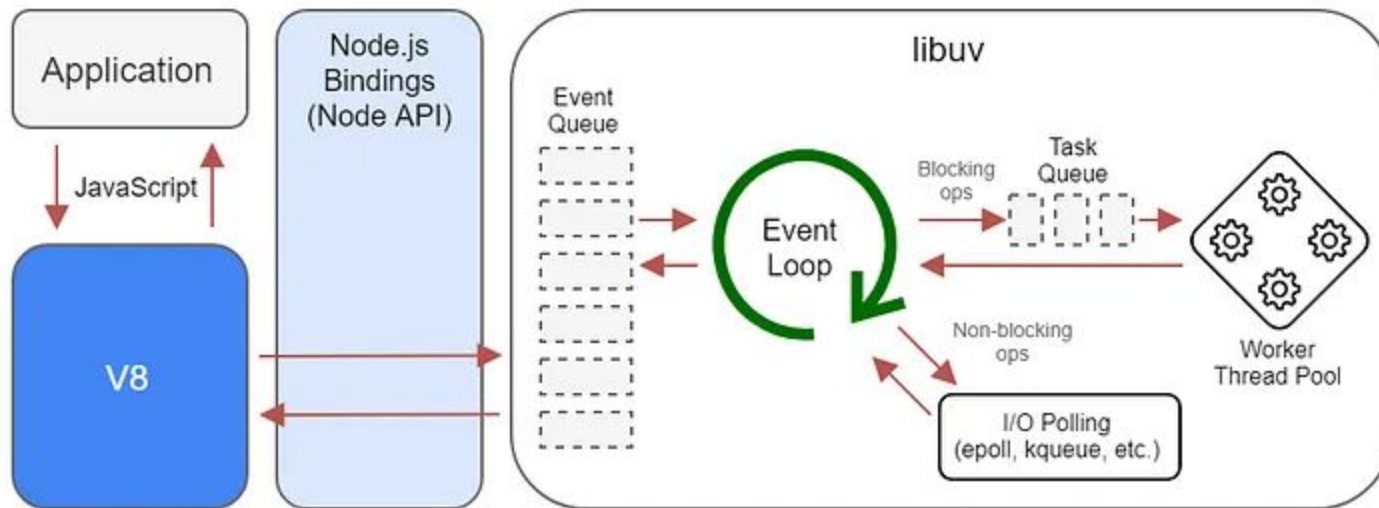

Workshop 1

What is Node.js

- Node.js runs on **V8** engine.
- **V8** is an open source JavaScript engine developed by Google.
- Node.js is an open source server environment
- Node.js is used to render '**server-side Javascript**'
- Node.js uses an '**event-driven, non-blocking I/O** model, which makes it lightweight.
- Node.js runs on single thread.
- Node.js doesn't support DOM implementation

Event Loop

We'll skip to Good Part

Thank You
